

# DRONA AUTOMATIONS

*From Sewage To Space*

## About Us

- Our business is focused on providing customized robots for wide range of customers.
- Customized Robots are designed and developed by using knowledge of various disciplines of Engineering and High-end Technology.
- We generate revenue through sales and services from our products.

## Vision

- To provide solution to the societal problems from sewage to space.
- To build a company as the prominent player in the field of Automation with global standards
- To use technology for developing products considering ethical values.
- To create space for students in production, research and innovation and High-end Technology.

# Our Products

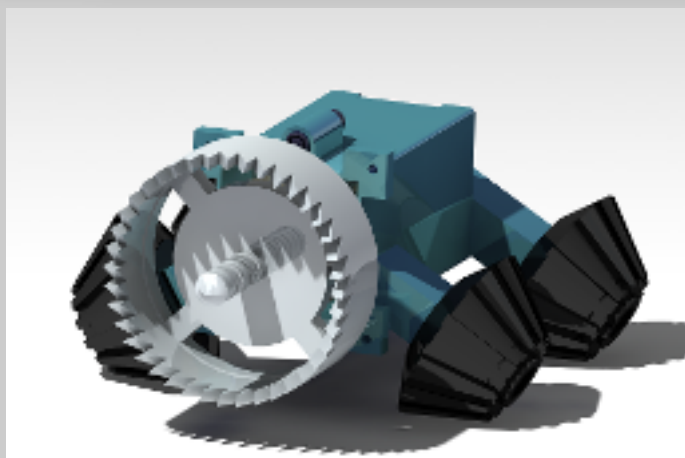

## Manhole Sewage Pipe Cleaning Robot (MSPCR - I)

- It clears blockages in manhole sewer pipes.
- It can be used for any manhole conditions.
- It is completely waterproofed (IP 68).
- It travels horizontally inside the sewer pipe upto 30 meters, with drilling operation.
- It has a in-built camera to visualize the conditions of the pipe and operations of the robot.
- It can drill blockages of any kind from hollow blocks to sponges, etc.
- It has a pushing force of 25Kgs.
- it has a user panel with a display unit.
- Entire unit is portable.

## Vertical Sewage Pipe Cleaning Robot (VSPCR - I)

- It clears blockages & scaling in vertical sewer pipes.
- It can be used for any pipe conditions.
- It is completely waterproofed (IP 68).
- It travels vertically inside the sewer pipe upto 9 floors, with cleaning operation.
- It has a in-built camera to visualize the conditions of the pipe and operations of the robot.
- It can drill blockages of any kind from hollow blocks to sponges, etc.
- it has a user panel with a display unit.
- Entire unit is portable.

## Horizontal Sewage Pipe Cleaning Robot (HSPCR - I)

- It clears blockages & scaling in horizontal sewer pipes.
- It travels horizontally inside the sewer pipe 30 meters, with cleaning operation.
- It has a in-built camera to visualize the conditions of the pipe and operations of the robot.
- it has a user panel with a display unit.
- Entire unit is portable.
